

## IPS Empress System technicians

### A time-tested system offers new possibilities

Through the years, the IPS Empress System has been continuously further developed to keep abreast of the latest trends. As a consequence, decisive enhancements have been made with regard to its aesthetics and function and its processing properties. With more than **33 million** restorations having been fabricated with the material to date, the system has gained a reputation for producing **long-lasting, natural-looking results and maintaining high quality standards.**

Irrespective of whether you use the press or CAD/CAM technique: the IPS Empress System continues to be synonymous with highly aesthetic fully anatomic single tooth restorations fabricated with all-ceramics.
